DETAILED ACTION

Response to Amendment

1. This action is responsive to the Amendments filed 30 June 2006. Claims 1-24 are pending. Claims 1, 12 and 13 are amended.

Allowable Subject Matter

2. Claims 1-24 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claims 1-13 are allowable over the prior art because a method of performing a measurement on a differential signal, comprising: introducing a plurality of bias levels into the comparison, whereby the output of the comparator has a logical value representative of a value at the first input compared to a value at the second input offset by the bias level and selecting a set of samples based on the percentage of samples in the set having first logical value is not found, taught or suggested in the prior art of record.

Claims 14-24 are allowable over the prior art an automatic test system suitable for making measurements of a differential signal applied as an input to the test system, the test system having a measurement circuit comprising: a timing input controlling the time at which a comparison is made; means for biasing the comparison by a variable amount in response to a control signal; control circuitry providing a timing signal
